

**Derrick at the
Oil Well Here is
Well Advanced**

EXPECT TO HAVE IT COMPLETED BY SATURDAY NIGHT—OTHER MACHINERY AND LUMBER BEING DELIVERED.

During the past week splendid progress has been made with the work preparatory to starting drilling for oil here by the Roth-drilling interests.

Mr. Reid, who is superintending the work says he expects to have the derrick completed by Saturday night and that drilling operations will commence just as soon as possible. Other

machinery and lumber is also being delivered daily at the scene of operations.

Reports from Mexico City would indicate that conditions are very serious in Mexico as a result of recent religious troubles. The latest report

"Two Catholic priests and between 27 and 37 Catholic citizens were executed by the military authority on August 1 and 2 on a charge of heading an uprising growing out of the religious situation.

The archbishop reported that the disturbances occurred in three towns

It is indeed sickening to think that such a state of affairs could possibly be tolerated in this enlightened age.

Minister Says C.P.R. Allowed Roads to Deteriorate

In an interview given recently Hon. V. W. Smith, provincial minister of

the E.D., H.C., and Central Canada railways by the province was the only policy consistent with public interest and that the rental offered by the E.D. would not cover the depreciation of the line due to neglect.

Mr. Smith said that the line had been allowed to deteriorate by the C.P.R. and that the rental offered would only be a small fraction of the profits that the C.P.R. could make from the traffic.

The minister vigorously defended the policy of the government in taking over the railway.

BIG IMMIGRATION OF UNITED STATES SETTLERS

Immigration of actual farm settlers from United States to Canada continues actively, according to information

immigration and colonization, Wednesday. In the months of June and July, the Canadian government agent at Fargo, N.D., recorded the movement to Canada of 854 American settlers. These farmers, accompanied by their wives and families, represent a new

CENSUS SHOWS THERE IS

An average increase of nearly 10 per cent in the population of 20 federal electoral districts of Manitoba, Saskatchewan and Alberta, as compared with 1921 figures, is shown by the quinquennial census of the three prairie provinces taken as from June 1, 1926. This announcement is made in a parliamentary statement of the total population issued by the Dominion bureau of statistics.

DEPARTMENTAL EXAMS

READING over the list of successful pupils in the recent Grade VIII examinations throughout the province, one cannot help but notice the predominance of foreign names appearing under the heading of every letter in the alphabet. This should serve to remind the British born children and their parents of two things. First, that there are a large parent age of foreigners in this province, and secondly that these children of foreign parents are taking advantage of every opportunity to get an education. This very fact should, in turn, cause British born parents and pupils of today to do a little anxious thinking and a little looking to the future. While all admire the foresight of our foreign parents in seeing to it that their children get the education which was denied them in their own country, and while it is only reasonable to suppose that any foreign child who reaches Grade VIII, in our schools will have by that time become a good Canadian citizen, yet it would be a pity—even a calamity—if our own Canadian and British born children of today should be handicapped when entering into competition with foreign men and women a few years hence, simply because they did not take advantage of the educational opportunities of today.

The trouble with a large percentage of young Canadians today is that they are being carried away with the offer of "jobs" with fairly good wages for youngsters who want pocket money for cigarettes and Charleston; while our foreigners are looking forward to positions, professions and possibly parliament of the future.

This is why so many of their names appear in the list of successful candidates in the recent departmental examinations.

ELECTION PROMISES

REPERRING to conditions in this district, Hon. Charles Stewart had the following to say while addressing the Liberal convention in Medicine Hat: "I have been a pet theory of mine that a scheme could be worked whereby the residents in this district could be put in a position where they would not be materially affected by a series of dry years." He had stuck to this theory and had advocated it in season and out of season. He also said that if the Liberals were returned to power he would give the assurance that the matter would be pressed until the difficulties with which this district is confronted would be solved.

It will be remembered that Mr. Stewart made similar promises to this district before, and that although he was then in Ottawa as a cabinet minister for four years nothing along that line has as yet been done. It is only on this, the eve of another election, Mr. Stewart remembers there are any difficulties in this district and that he again reminds us of his pet theories which he has never put into practice. Mr. Stewart has evidently forgotten that old saying: "You can fool some people all the time and all the people some of the time, but you can't fool all the people all the time."

It was under Conservative rule at Ottawa and under the membership of Rt. Hon. Arthur Meighen that the Canadian National Railway was brought into being. It was largely through Mr. Meighen's own personal efforts as premier that the two old transcontinental railways, which were becoming a burden to the country were taken over by the government and nationalized. Does it not, then, naturally follow that the man who was responsible for creating our national railway is the one man in Canada who will be most interested in the success of that railway? As Mr. Meighen said himself in Medicine Hat a few years ago: "the moment the Canadian National Railway becomes a paying proposition and an asset to Canada, that moment will the policy of Arthur Meighen and the Conservative party be vindicated." In the face of this it is not absurd for Mr. Kinnear and other Liberal speakers to be going about the country trying to make the people believe that Mr. Meighen is attempting to retard and obstruct the success of our Canadian National Railway. Nothing could be more absurd.

If we are to judge from remarks made by Progressive members of the last parliament, who are now seeking re-election, they must have passed through some trying experiences when they came out after the election of last October, when they were offered all kinds of bribes for their support. One Progressive said it was hell, and it looked that way. No matter what criticism may be leveled against the group form of government as advocated by Progressive leaders, it must be admitted—now that all the facts are coming out—that a fair percentage of Progressive members stuck to their guns amidst a barrage of coaxing temptations, and the camouflage of their own leader. For this they are entitled to their share of credit. In all but one case in Alberta their constituents are showing their approval by re-nominating them as candidates in the coming election.

Under the heading "Unsavory Tactics" the Medicine Hat News tries to accuse the Conservative party of mud slinging in this election simply because Conservative speakers and papers are informing the public of the graft and corruption which was exposed during the recent investigation into the Customs department under Liberal rule. The News appears to forget that it was Liberal government officials who, by their actions, furnished the material for what the News calls "mud." The Lethbridge Herald also refers to mud slinging in one issue and in its next issue it refers to a Conservative candidate as a pinhead. Mud is mud whether its the size of a pin or the size of a mountain.

In accepting the nomination at the Liberal convention in Medicine Hat last Friday evening Dr. Gershaw made it quite plain that, if elected, he will have a free hand to deal with whatever question comes up in parliament. The fact that Dr. Gershaw found it necessary to make this statement may be taken as an indication that after several sessions at Ottawa he is not now as strong a party man as he once was. It also means practically, that Dr. Gershaw is running as an independent. When the doctor says he found no necessity for voting against the Liberal government in the last session he is indicating that he condones the corruption exposed in the Customs department.

Ex-premier King, Dr. Gershaw and other Liberal speakers are trying to take the credit for the introduction in parliament of old age pensions, H. B.

railway, criminal law amendments, etc., on the other hand. Progressive members from all over the country are telling their constituents that all these measures were introduced by Progressives and were supported by the Liberal party as part of the price the Liberals were pay for Progressive support. So there you are.

Here and There

"Miners staked in the Red Lake gold mining field are keeping the recorder's office busy. Prospectors are of the belief that the area from Red Lake to the Manitoba boundary is promising and already many square miles of territory west of Red Lake has been staked."

During the eleven months ending February 28, the ordinary revenue of the Dominion was \$337,596,448 or an increase of twenty-one millions over the sum of \$306,991,507 for the corresponding period of the previous year. Ordinary expenditure is about the same as a year ago. On February 28 last it totalled \$276,589,417.

Archie Goe, the good-natured chief on the Canadian Pacific liner Empress of Asia, superintended the transatlantic voyage of 50,000 Canadian fish eggs from Vancouver to Kobe. The shipment necessitated extremely careful handling. The eggs were packed in ice, and had to be kept at an even temperature during the entire voyage.

Lord Allenby, conqueror of Palestine, was greeted by high crowds on his arrival in Montreal in March. The leaders of the local militia were on hand to do homage to the famous general who played a decisive role in the monument to Canada's fallen soldiers in the Windsor Station. Viscount Allenby also spoke at the St. Denis Theatre.

The Dominion Experimental Farms system announces the introduction of a new and valuable variety of field peas which may mean to the field peas what Marquis has meant to the growers of wheat in the west. The new variety is a selection from a cross made at Ottawa between Mummy and Black Eye Marrow varieties.

Gross earnings of the Canadian Pacific Railway during 1925 amounted to \$182,562,156 as compared with \$182,562,156 in 1924, while working expenses last year totalled \$142,581,228 as compared with \$142,581,228 in 1924, leaving a balance, after deduction of fixed charges, of \$39,980,928 for 1925, as compared with \$39,980,928 in 1924.

In an interview in Montreal recently, E. W. Healey, president and chairman of the Canadian Pacific Railway, said that the National Conference of Education, scheduled for April, would be of incalculable importance for the future of the Canadian people. Mr. Healey is chairman of the Montreal Committee which undertook the organization and financing of the Conference.

Count Thun Hohenstein, one of the wealthiest men in Czech-Slovakia, who arrived on the Canadian Pacific liner Montclair recently, is to purchase a large tract of land around Calgary. Count Hohenstein, owner of large properties in Czech-Slovakia, is well versed in scientific farming and came to Canada in 1912 after years of study concerning the great possibilities which await the right type of settler.

A party of twenty-five schoolboys arrived at Montreal in March, under arrangements made by the Macdonald Agricultural College, St. Anne de Bellevue, and the Canadian Pacific Railway. At the college the boys receive a short training in the rudiments of Canadian farm methods and are placed in suitable positions on farms in the spring. An experienced supervisor oversees his entire energy to see that the boys are well taken care of.

Three known dead, two reported killed, two men, critically wounded and one man reported missing was the toll from two encounters between run runners, blacklegs, bootleggers and federal agents in Florida.

Maple Syrup Time in Old Quebec

Shedding Sugar the Old

Maple sugar sap is flowing now through the many forests of the ancient province of Quebec. Every train coming into Windsor Station, Montreal, from the Eastern Townships brings increasing supplies of maple syrup. In assorted containers, in cans, kegs, cream buckets, jars, crates, gallons, etc. in every conceivable shape or form, the delicious liquid comes pouring through the gateway of the Canadian metropolis. Similar shipments pour into the Pier Victor Station from the famous Laurentian mountains during the months of March and April every year. This spring the cold winds showed up the sap early in April, but by the end of the month larger amounts were received, the peak being reached usually about the last week of April.

Supplies of maple syrup are the mountain wildernesses ring with their sapling every week-end during the second month of spring. Men and women, boys and girls, wrapped in overalls and arrayed in sundry headgear, stand under the trees and drink maple syrup from huge cans, sampling the first of the season's output. "Ah-h-h-h-h! It's good," flirts out the unanimous verdict. Expressions of delight flow from the faces of the participants of the sugaring bees as they dip wooden ladles into the flowing syrup, raising them hastily to their lips so as not to lose even a drop.

According to Dominion Express officials at Montreal the quality of the syrup leaves little to be desired while the quantities being received are well up to the average of former years. Most of these shipments go to produce dealers in Montreal, but quite a quantity is sent direct to retailers and a fair amount is shipped to consumers who look forward every spring to this dairy sweetener from the Quebec maple groves. Out West, too, where maple trees are not found, former inhabitants of the province of Quebec get the maple sugar feeling every year and a considerable number of small shipments go forward to satisfy it.

While the picturesque method of splashing the trees and gathering the sap in an iron pot or in a better driven by horses on a sled still prevails in many parts of rural Quebec, the sap is left, free of all impurities.

A shipment of one million dollars in gold to Canada was announced yesterday by the Bank of Montreal, a continuation of the movement started about two weeks ago.

WORLD HAPPENINGS
BRIEFLY TOLD

The bill approving the new trade agreement between Canada and the West Indies was given final reading in the house at Ottawa.

The National Assembly at Ankara, the Turkish capital, has refused the treaty between Great Britain and Turkey setting the dispute over Mosul.

Julius Miller, of Michigan City, Indiana, shot his right eye with a pair of pistols while riding from the road a bull which penetrated Miller's skull.

C. A. Ferguson, K.C., of Winnipeg, was unanimously elected president of the Manitoba Bar Association, at the annual meeting in Winnipeg.

The Humanitarian Government has ordered five submarines from Italy. Italy is also completing the reconstruction and refitting two Italian built torpedoes for destroyers for Romania.

The first commercial shipment of red potatoes from British Columbia to California went forward recently, consisting of 80 tons of Burbank certified seed.

It was officially announced by the grain division of the Vancouver Merchants' Exchange that no further quotations on grain would be issued until September 1.

Three years absent from his native coast a homing pigeon recently returned to England. It was lost in Massachusetts, France, July 10, 1922. This is considered a remarkable feat of bird memory.

Senator Dandridge, government leader, replying to a question in the senate, said the government intended to appoint a minister plenipotentiary to Washington. As to whether the appointment would be made this year was under consideration.

There were more than 16,000 casualties, 1,614 of which were killed, in the Prussian military in 1925, according to information given out by the Prussian ministry of trade. Eighty per cent of the casualties occurred in the Ruhr district.

President Briand of France has asked the League of Nations to begin a conference on international trade. Briand's action was taken as a result of the recent Hungarian quarantine law, which caused Europe to be flooded by bogus trade goods.

Liquor license renewal would not be allowed to go into Canada without a receipt or any similar paper if the Customs Act is amended to include a recommendation made before the present law by W. F. Wilson, chief of the customs preventive service for Canada.

A Birthday Gift

Canada Returns the Two Cent Postage Rate

On and after July 1 it will cost only two cents to send a letter from any part of Canada to any other part of the United States and Mexico. At present the letter rate in Canada and to points in the United States and Mexico is three cents per ounce, one cent of which was tax that was imposed on April 1, 1925.

The return of the letter rate to one cent was the return to the more popular two cent rate, the same as it is in other parts of the United States, was provided for in the Canadian budget recently submitted to the Canadian Parliament by Hon. James A. Robb, minister of finance and now approved.

It is expected that the return of the letter rate will cause a big increase in postal business in Canada not only in the urban centers, but in the farming districts served by 3,772 rural mail routes with about 210,000 boxes on them.

The Canadian public regard this reduction in the letter postage rate as a birthday gift from the government. A birthday gift to the nation was made on July 1 will be the 50th anniversary of Confederation, when Canada became a self-governing and united Dominion.

British To Control

Marconi Company

Only Small Percentage of Island Shores Capitalized by Foreigners

At an extraordinary meeting the Marconi Telegraph Company agreed to an alteration of the terms of its lease whereby the company will remain under British control and not more than 25 per cent of the leased shore capital will be held under foreign control. Only natural born Britons will be eligible as shareholders or officers in the United Kingdom or the British dominions.

The British with a great many jetties men who want to see life in the city that has been built up in the north of the island.

The woman who runs after a husband until she gets one seldom has a lot of fun.

W. N. W. 1925

Symbol of Armed Force

German Military Uniforms Seen At Peace Conference

German military uniforms were the only military uniforms visible at the conference table at Geneva when reports under the auspices of the League of Nations began to circulate official documents on May 18 at Geneva, Switzerland.

The one great nation theoretically already disarmed, Germany was the one nation to appear with the symbol of armed forces. That is the one nation to appear with the symbol of armed forces. That is the one nation to appear with the symbol of armed forces.

It is not armament that makes a nation dangerous, but an armed will. The fact that Germany has been forced to destroy much of her weapons of war and to disband her great military machine does not make her neighbors any the less in terms of arms and armies. Of all the problems before these experts at Geneva, the chief is that of finding a way to secure moral disarmament.

To Preserve Niagara's Beauty

Scientific Beauty Of Niagara Falls Is To Be Safeguarded

Constitutional is under way of a joint committee representing Canada and the United States to discuss:

(1) Preservation of the scenic beauty of Niagara Falls.

(2) The quantity of water which may be further diverted from the Niagara River without interfering with the beauty of the falls.

Canadian representatives on the committee are Col. M. D. Duggan, Ottawa; J. G. Johnston, chief of the water powers branch, department of the interior, Ottawa; and Dr. C. P. Cammell, deputy minister of mines, Ottawa. Nations of the United States representatives on the committee have not yet been received.

Principles of the committee are: (1) The quantity of water which may be further diverted from the Niagara River without interfering with the beauty of the falls.

(2) The quantity of water which may be further diverted from the Niagara River without interfering with the beauty of the falls.

(3) The quantity of water which may be further diverted from the Niagara River without interfering with the beauty of the falls.

(4) The quantity of water which may be further diverted from the Niagara River without interfering with the beauty of the falls.

(5) The quantity of water which may be further diverted from the Niagara River without interfering with the beauty of the falls.

(6) The quantity of water which may be further diverted from the Niagara River without interfering with the beauty of the falls.

(7) The quantity of water which may be further diverted from the Niagara River without interfering with the beauty of the falls.

(8) The quantity of water which may be further diverted from the Niagara River without interfering with the beauty of the falls.

(9) The quantity of water which may be further diverted from the Niagara River without interfering with the beauty of the falls.

(10) The quantity of water which may be further diverted from the Niagara River without interfering with the beauty of the falls.

(11) The quantity of water which may be further diverted from the Niagara River without interfering with the beauty of the falls.

(12) The quantity of water which may be further diverted from the Niagara River without interfering with the beauty of the falls.

(13) The quantity of water which may be further diverted from the Niagara River without interfering with the beauty of the falls.

(14) The quantity of water which may be further diverted from the Niagara River without interfering with the beauty of the falls.

(15) The quantity of water which may be further diverted from the Niagara River without interfering with the beauty of the falls.

(16) The quantity of water which may be further diverted from the Niagara River without interfering with the beauty of the falls.

(17) The quantity of water which may be further diverted from the Niagara River without interfering with the beauty of the falls.

(18) The quantity of water which may be further diverted from the Niagara River without interfering with the beauty of the falls.

(19) The quantity of water which may be further diverted from the Niagara River without interfering with the beauty of the falls.

(20) The quantity of water which may be further diverted from the Niagara River without interfering with the beauty of the falls.

(21) The quantity of water which may be further diverted from the Niagara River without interfering with the beauty of the falls.

(22) The quantity of water which may be further diverted from the Niagara River without interfering with the beauty of the falls.

(23) The quantity of water which may be further diverted from the Niagara River without interfering with the beauty of the falls.

Claims Discovery Of

Long Sought Secret

Chemist Announces Creation of Life By Artificial Means

The claim of John F. Maerz, chemist, that he had succeeded in creating life, has excited widespread interest.

Maerz has a catalogue of reports against a sensational exposure of his work which might produce a shock to the public mind.

He has been working five years on the spontaneous creation of life. He is not disturbed by the refusal of Prof. Francis H. Horvick, head of the biology department of Western Reserve University at Cleveland, to take any stock in his discovery.

"If he got life," Prof. Horvick has said, "I might have been disappointed already contaminated by life. Invariably that has been the case every time of producing life from inanimate matter have been made."

"I don't blame Prof. Horvick for saying," says Maerz, "I would have been disappointed already contaminated by life. Invariably that has been the case every time of producing life from inanimate matter have been made."

"I don't blame Prof. Horvick for saying," says Maerz, "I would have been disappointed already contaminated by life. Invariably that has been the case every time of producing life from inanimate matter have been made."

"I don't blame Prof. Horvick for saying," says Maerz, "I would have been disappointed already contaminated by life. Invariably that has been the case every time of producing life from inanimate matter have been made."

"I don't blame Prof. Horvick for saying," says Maerz, "I would have been disappointed already contaminated by life. Invariably that has been the case every time of producing life from inanimate matter have been made."

"I don't blame Prof. Horvick for saying," says Maerz, "I would have been disappointed already contaminated by life. Invariably that has been the case every time of producing life from inanimate matter have been made."

ON THE AIR

What is Doing in the World of Radio

One advantage in having the program over the radio is that the preacher can't spot you. If you go to sleep.

A woman moved recently from her old home at Marion, Ohio, saying that she "didn't" and neighbors were not, but that there was too much to get anything over the radio.

Radio broadcasting stations located outside of the metropolitan area of New York city have their studios in the city. The programs are sent out by remote control.

Canada's famous train which makes a daily run at 226 1/2 miles at the rate of 77 miles an hour without a stop during the entire trip, is now equipped with radio for the entertainment of passengers.

Although Mr. Edison assures us that the world needs no more inventions, we think there is a market for some device which will tell the recipient of a radio photograph just how the artist really looks.

Arthur Guyot, of Cambridge, Mass., is totally blind, but he is able to derive satisfaction and education from his radio set. He can "read" the dial with his fingertips and has a keen eye for the details of the dial.

He has a keen eye for the details of the dial. He has a keen eye for the details of the dial. He has a keen eye for the details of the dial.

He has a keen eye for the details of the dial. He has a keen eye for the details of the dial. He has a keen eye for the details of the dial.

He has a keen eye for the details of the dial. He has a keen eye for the details of the dial. He has a keen eye for the details of the dial.

He has a keen eye for the details of the dial. He has a keen eye for the details of the dial. He has a keen eye for the details of the dial.

Modding Through

A. S. Draper in the New York Herald-Tribune

"I suppose we shall muddle through this war," said a man frequently during the first year of the war, and it is being repeated now.

The truth is that the English do less muddling than most people. It is the sentence of vain people, a people who are not content with the present, a people who are not content with the present.

It is the sentence of vain people, a people who are not content with the present, a people who are not content with the present. It is the sentence of vain people, a people who are not content with the present.

It is the sentence of vain people, a people who are not content with the present, a people who are not content with the present. It is the sentence of vain people, a people who are not content with the present.

It is the sentence of vain people, a people who are not content with the present, a people who are not content with the present. It is the sentence of vain people, a people who are not content with the present.

It is the sentence of vain people, a people who are not content with the present, a people who are not content with the present. It is the sentence of vain people, a people who are not content with the present.

It is the sentence of vain people, a people who are not content with the present, a people who are not content with the present. It is the sentence of vain people, a people who are not content with the present.

Interesting Local Items

Mrs. Gibson and Miss Odell, of Medicine Hat, spent yesterday in town the guests of Mrs. Hicks.

Marie Quinn received word this week that she had passed her grade IX exams.

The famous Colchester Guard Band will appear in the Arena, in Medicine Hat on Wednesday, August 18th.

Margaret Martin has received word that she was successful in passing the grade X examinations. She made a full pass.

Word has been received by her parents that Viva Cox, who is now visiting friends in Vancouver, was successful in passing her grade IX exams.

A nice shower of rain passed over this district last Sunday night. This is the first rain we have had since July 1st. Although a little late to do much good to the crops, it will help garden stuffs and pasture.

At a meeting of the school board held last week the resignation of Miss Snodden from the staff was accepted and Mr. Bernard Thatcher was engaged to fill the vacancy. Miss Snodden has accepted a position on the Sterling school staff.

In the baseball game yesterday afternoon between Medicine Hat and Swift Current, Cyrie Ray, was put in as a pinch-hitter in the seventh. With two on base he knocked out a two-bagger, bringing in two runs and winning the game.

The Vega Redcliff Lodge, Redcliff, has decided to have a social evening and dance in Cliff hall on the evening of September 6th, at 8 p.m. Admission, \$1.00 a couple, extra lady free. Good music and a good time assured. All welcome.

At a meeting of the School Board held last week, Theo. Thorndalen was engaged to principal of the school for next term. Mr. Thorndalen has accepted the position and will be on hand for the opening after the holidays.

The manager of the local greenhouse intends putting in a nice crop of flowers for fall and winter sale. Already a large number of forms of various varieties have been set out. It is his intention to have a number of potted plants for sale in the near future.

A last period fire in the Serge district west of Vancouville destroyed several thousand acres of pasture last week. Thousands of sheep were pasturing in the district but the herders managed to get them to safety along the river bank without losing any. The sheep belonged to Taylor Bros.

A general meeting of the Canadian Legion will be held in the club room on Sunday next at 5 p.m. A full attendance is requested at this meeting as final arrangements will be made for both the memorial day service and the picnic planned for Labor day.

Miss Stronach and Miss Snodden left last week on a holiday trip to Calgary and Banff. They were accompanied by Miss Dunsmuir who has been visiting Miss Stronach and Miss Snodden while they visit friends in Calgary.

Mrs. Geo. A. McKay left week to visit her daughter, Mrs. G. Stone, at Oxbow.

Harold Cann, who has been spending the past week in town with his parents, left this morning for Banff where he will stay a few days before returning the school at Cranbrook.

While on a visit to the Dubois farm west of town, Jim Macdonald, has the misfortune to break his arm in two places. He was riding a young horse which threw him. Jim was taken to the Medicine Hat hospital where the fractures were set. He is now progressing favorably.

The C.P.R. and Lethbridge Vets will play their game in the Bennett Sticks competition on Saturday evening of this week. The game will be played in Medicine Hat commencing at 6:15. The winners of this game will play the winners of the Mitchell-Kimberly game.

Louis Leland, 24 year old half breed, was killed on the C.P.R. track in Medicine Hat last Friday. He had evidently fallen asleep near the track and the engine of a Crown Point train struck him before the engineer could stop the train. He was killed instantly. Burial at one time held in Redcliff with Redcliff.

Three Redcliff brides of yesterday were comparing notes recently and discovered two were married on August 11 and one on Aug. 12, so they decided to all celebrate together. The couples concerned were Dr. and Mrs. Patterson, Mr. and Mrs. E. Walter and Mr. and Mrs. E. L. Stone. The celebration consisted of a dainty dinner at Dr. and Mrs. Patterson.

NOTICE

NOTICE is hereby given that a petition has been presented to the Council of the Town of Redcliff under the provisions of "The Early Closing Act" praying for the passing of the following By-Law amending Early Closing By-Law Number 143 of the Town of Redcliff:

A BY-LAW OF THE TOWN OF REDCLIFF to amend Early Closing By-Law number 143 of the Town of Redcliff.

THE MUNICIPAL COUNCIL OF THE TOWN OF REDCLIFF in Council Assembled meets as follows:

1. That section 1 of Early Closing By-Law number 143 of the Town of Redcliff, passed on the 25th day of September 1922, be amended as follows: "by striking out the following words: 'During the months of May, June, July, August and September' and substituting therefor the following words: 'During every month'."

2. That this By-Law shall come into effect upon the day of the date of the final passing thereof.

THE MANAGER OF THE LOCAL GREENHOUSE intends putting in a nice crop of flowers for fall and winter sale. Already a large number of forms of various varieties have been set out. It is his intention to have a number of potted plants for sale in the near future.

Another nice shower last night freshened things up a bit.

A Medicine Hat man was given 7 days in the pen for driving a cow while under the influence of liquor.

Leonard Henderson was taken to the Medicine Hat hospital last evening suffering from internal troubles. His case has not yet been diagnosed.

A report says forest fires are menacing the Hudson's Bay railway. This railway has been menacing our politicians for some time.

FOR SALE—Two cows and fifteen chickens. Apply to Mrs. T. J. Amabile.

According to the census taken recently in Western Canada, Medicine Hat federal constituency shows a 10 per cent increase in population of 7,975 since the census of 1921. The city of Medicine Hat shows a reduction of 114. Its population now is 9,219.

In the recent in the new Valley constituency, Mr. Shaw gained one vote. He now has two of a majority. There are still a few ballots to be decided upon by the judge.

Some complaints have been registered lately about cattle and horses getting into gardens and lawns and doing damage. With the present poor condition of the prairie it is only natural that these animals will seek their way to the green spots. Extra precaution should be taken when tethering stock out.

You can always get a nice assortment of stationery, visiting cards, etc., at the Review office.

With the present poor condition of the prairie it is only natural that these animals will seek their way to the green spots. Extra precaution should be taken when tethering stock out.

You can always get a nice assortment of stationery, visiting cards, etc., at the Review office.

Some complaints have been registered lately about cattle and horses getting into gardens and lawns and doing damage. With the present poor condition of the prairie it is only natural that these animals will seek their way to the green spots. Extra precaution should be taken when tethering stock out.
